**EVERYTHING YOU NEED,
ALL IN ONE PLACE.**

FMI COMPARTMENT MANAGEMENT DESIGNED AROUND HOW YOU WORK.

Your truck doesn't just hold tools. It holds trust.

Every compartment, every drawer, every lock is designed so your team can act without thinking, reach without searching, and focus on what matters most: saving lives.

FMI designs, manufactures, and installs compartment management solutions that give you the confidence to move fast, respond safely, and do your job without compromise.

OUR APPROACH IT'S STORAGE DESIGNED WITH STRATEGY.

FMI solutions start with how crews actually operate in the field. We design around real workflows, real equipment, and real-world response—so every compartment supports speed, safety, and consistency.

- ✓ Understand the Way You Operate
- ✓ Designed with Purpose
- ✓ In-House Manufacturing
- ✓ Operate with Confidence

COMPLETE ACCESS SOLUTIONS COMPARTMENT MANAGEMENT. LIGHTING. DOORS.

A compartment is more than storage—it's lighting, access, and layout working together.

FMI partners with you to maximize space and create the most efficient toolbox possible. Backed by sister companies AMDOR and Luma Bar, FMI delivers an integrated solution that brings compartment doors, storage, and lighting together as one system.

HOW TO UPFIT

3 WAYS TO CREATE COMPARTMENT MANAGEMENT THAT WORKS FOR YOU.

Every department has unique needs - that's why we offer three ways to customize your storage.

	READY-MADE	BUILD & SHIP	CUSTOM DESIGN
What it is?	Pre-engineered and ready-to-order storage and organization products ready for immediate purchase.	Semi-custom, modular solutions built to your measurements and shipped ready for installation—flexibility without the complexity of full custom.	Fully engineered, tailor-made compartment solutions installed by FMI at our facility.
Best For	Ideal for departments looking for quick, reliable upgrades with minimal downtime and fast, standard installs.	Designed for departments seeking a balance of customization, speed, and budget.	Departments seeking the highest level of customization with maximum optimization and efficiency.
Application	New Trucks, Fleet Retrofits, Refurbs		
Customization	★ ☆ ☆ - Low	★★ ☆ - Medium	★★★ - High
Lead Time	Fastest	Moderate	Longest (full engineering + installation)
Installation	Customer-Installed	Dealer-Installed	FMI-Installed
Features	• Pre-engineered layouts • Standard sizes and components • Quick installation	• Modular components or bundles • Built to your measurements • Fully engineered and design if required	• Full engineering and design consultation • Workflow analysis and CAD modeling • Specialty access
Benefits	• Minimal downtime • Cost-effective • Predictable performance • Fastest way to upgrade storage	• Specialized fit • Faster install than full custom, balance of customization and budget • Scales easily, whether upgrading one truck or standardizing a fleet	• Maximum space optimization • Peak operational efficiency • Specialized response support.

THE UPFIT PROCESS

The upfit process is a collaborative approach to compartment design, ensuring every inch of space is organized, accessible, and mission-ready.

	READY-MADE	BUILD & SHIP	CUSTOM DESIGN
Consultation	Browse online or call for recommendations	Provide measurements or allow FMI to measure	Expert FMI Design Engineer led consultation
Design	Pre-defined products	FMI prepares layout based on your dimensions	Custom design, equipment mapping & workflow planning
Build	Already built or quick-ship	Built-to-order	Fully custom fabrication
Delivery & Install	Ships and customer installs	Shipped ready to bolt in	Customer delivers unit to FMI; installation performed in-house
Final Result	Fast improvement in storage	Tailored fit + quick turnaround	Premium, turnkey solution optimized for operations

FMI’s state-of-the-art facility is built for precision, **featuring multiple CNC Press Brakes, a Trumpf laser, a large-bed Timesaver, dedicated welding stations, advanced 3D printing technology, and a complete in-house paint facility**—giving us unmatched control from raw material to finished product.

A COMPARTMENT IS MORE THAN STORAGE. IT'S A SYSTEM.

You don't interact with compartments in pieces. You open the door. The light comes on. The tool is right where it should be.

DOOR SYSTEMS

COMPARTMENT DOORS

AMDOR roll-up doors are purpose-built for emergency response—delivering smooth operation, long-term durability, and dependable access. Designed to integrate with FMI storage layouts and Luma Bar lighting, AMDOR doors are fully custom.

Features:

- Driven ball and socket design acts as a structural hinge making the AMDOR curtain the strongest on the market.
- Smooth interior wall.
- Bottom flange cut-outs allow for easier access with gloved hands.
- Available with snap-in Luma Bar Integral LED lighting system.

AMDOR

LIGHTING SOLUTIONS

COMPARTMENT & GROUND LIGHTING

Luma Bar® delivers purpose-built LED lighting designed to work as part of a complete FMI system. With flexible configurations, NFPA 1901-compliant options, and IP68-rated protection, Luma Bar® lights are engineered to perform in real-world emergency and specialty vehicle applications. Every product is tested for durability and built to last.

FMI SUZAN™

20" & 24" FMI SUZAN™

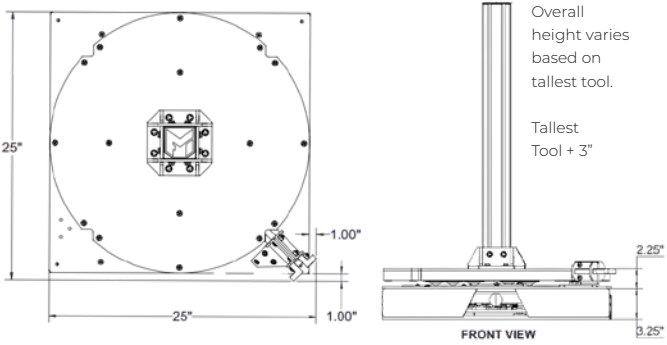

The FMI SuZan™ is the ultimate rescue tool storage solution for modern emergency vehicles. The FMI SuZan™ stores all name brand extrication tools with sturdy quick release mounts. Its design allows you to spin the tray and grab the tool you need at a moments notice. An optional slide-out completes the package to give you the most effective multiple extrication tool holder on the market.

Features:

- Accommodates all name brand extrication tools.
- Robust heavy-duty components.
- Secure, precision-engineered tool mounting process.
- Spins for easy access to all mounted tools.
- Sturdy quick release mounts and brackets.
- Optional slide-out. (Rated up to 600 lbs.)

20" FMI SuZan™

24" FMI SuZan™

OIL DRY HOPPERS

☒ Ready-Made ☒ Build & Ship ☒ Custom Order

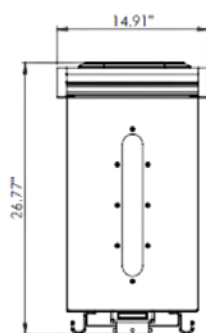

20", 24", & 26" OIL DRY HOPPERS

Requires: Adjustable Shelf Kit (FMI-41001)

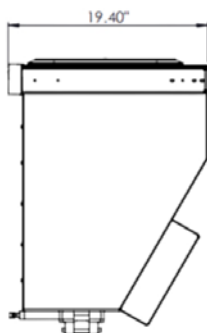

Shelf-mounted oil dry hoppers offer a secure, efficient solution for storing and dispensing oil dry. Mounted on smooth-operating slides, the top-loaded hopper keeps material dry and ready for use without the mess of loose bags or buckets. A handle-activated gate valve and optional collapsible bucket make dispensing quick, controlled, and easy on scene.

**Features:**

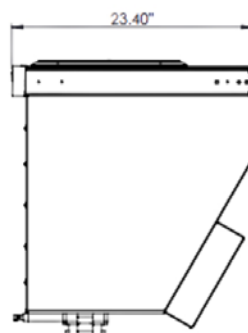

- Top latch keeps contents secure.
- Mounted on drawer slides for easy access.
- Handle activated gate valve for dispensing.
- Clear front window sight to see current fill level.
- Hooks underneath to hang optional collapsible bucket.

TOOL BOARDS

SINGLE SWING OUT TOOL BOARD
with Optional Pull Out Back Wall

The Swing Out Tool Board maximizes compartment storage on emergency vehicles by providing durable, easy-to-configure tool mounting. Constructed from a durable polymer, the board allows for simple, secure tool placement while standing up to demanding conditions. A heavy-duty latch system keeps the board securely in place whether open or closed. Available through FMI's Build & Ship program, the Swing Out Tool Board can be custom designed to create a complete, ready-to-install solution delivered directly to you.

Features:

- Optional pull-out back wall for additional storage.
- Latch system keeps boards secure whether open or shut.
- Durable polymer board allows for easy and secure tool mounting.

COMBINE STORAGE, LIGHTING, AND DOORS THE VALUE OF BUNDLING.

FMI bundles storage, lighting, and access into a single, integrated compartment system. Each component is designed to fit and function together—reducing complexity, improving installation, and delivering a cleaner, more efficient result.

The outcome is faster access, better organization, and compartments that work the way crews do — on every call, every time.

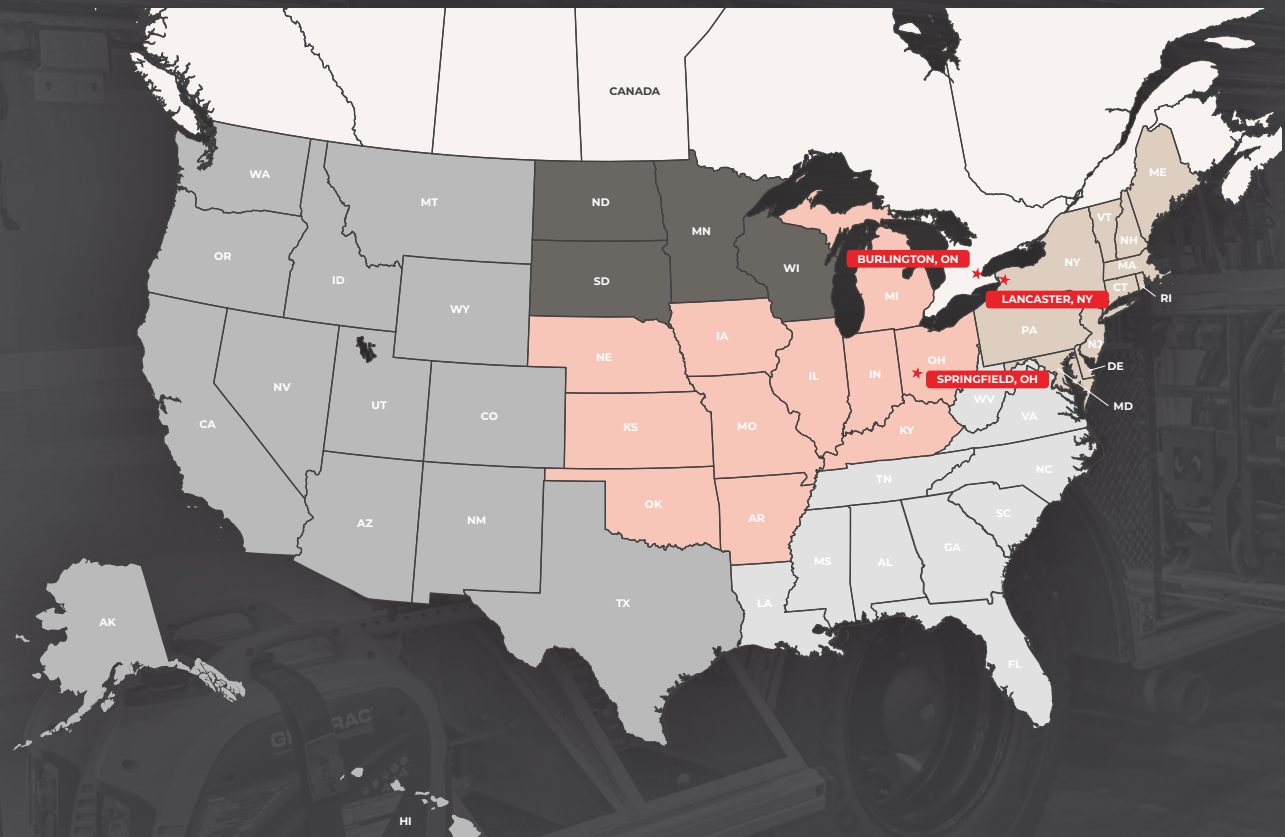

SPEC YOUR TRUCK

Work with FMI from the very start to ensure your truck meets your needs, performs flawlessly, and maximizes efficiency.

KEY BENEFITS

- **Integrated Design:** Storage, lighting, and doors engineered to fit and function together.
- **Simplified Build Process:** Minimize revisions and streamline installation.
- **Faster Response on Every Call:** Compartments and systems designed around how crews actually operate.
- **Custom Flexibility:** Fully configurable options to match department needs, vehicle type, and operational priorities.
- **Cost & Time Savings:** Early planning reduces wasted time, prevents costly retrofits, and ensures smoother deliveries.

Our sales team is ready to support your operation wherever you respond.
